1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Sano et al., U.S.

Patent 5,796,154.

3. Pertaining to claim 6, Sano teaches a solid-state imaging device having a light-receiving portion of a pixel formed in a region on the substrate surface, a convex lens with an upwardly curved surface 2 which is positioned above the light-receiving portion and embedded in an inter-layer dielectric 5, and an on-chip lens 1 formed above said convex lens, characterized in that said convex lens is formed on the depression in the surface of the underlying inter-layer dielectric

such that the lower part of the lens which is made of the light transmitting material filling said depression is integral with the upper part of the lens which is made of the same light transmitting material as that of the lower part of the lens and has the convexly curved lens surface.
